

COMPANY PROFILE

www.alfawaterproofingandpaint.co.za

INTRODUCTION

Alfa Waterproofing and Paint was established with the vision of being the first choice for our clients by providing a professional service in all construction aspects either commercial or industrial.

MISSION

- *To establish and maintain long-term working relationships with clients and providers*
- *To provide a comprehensive, professional and efficient service to our clients*
- *To continuously upgrade, train and retain staff*
- *To maintain our commitment to social responsibility within the community*

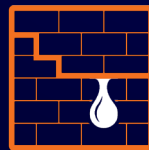

WATERPROOFING

- Tiled, IBR, Corrugated Roofs
- Flat Concrete Slabs
- Exposed Balconies / Verandas
- Internal Showers
- Retaining Walls
- Water Features
- All Exposed Areas

WALL & ROOF COATINGS

- Internal & External Walls
- Tiled, IBR, Corrugated Roofs
- Ceilings & Cornices
- Widow & Door Frames
- Steel Elements
- All Structural Elements

DAMP PROOFING

- Damp Proofing of Showers
- External Walls
- Boundary Walls
- House Walls
- Window Sills
- Basements
- All Brickwork

WATERPROOFING

- Torch Fusion & Bituminous Systems
- Polyurethane Liquid Rubber Systems
- Cementitious Waterproofing Systems
- Acrylic Based Waterproofing Systems

As a reputable waterproofing company we specialise in all kinds of waterproofing. We make use of only the highest quality materials such as Derbigum, Saint Gobain & Viapol, Sika, NUI & many more. Membrane reinforced waterproofing is Acrylic based and comes in liquid form, this product is especially effective where one will apply a top coat / roof acrylic as the final layer. It's also very affective for those hard to reach places or waterproofing around protruding elements. Membrane reinforced waterproofing is also very affective when applied on top of gable or boundary walls as to eliminate any penetrating moisture. Polyurethane liquid rubber is seamless, maintenance free and able to expand and contract accordingly. We highly recommend making use of a Cementitious Waterproofing System for internal showers as well as exposed balconies.

WALL COATINGS

- *Internal & External Wall Coatings*
- *Structural Steel Coatings*
- *Residential & Commercial Wall Coatings*
- ✓ *Airless Spray*
- ✓ *Brush & Roller Application*

Alfa Waterproofing Painting Contractors specialise in residential as well as commercial wall coatings. We take pride in our preparation work as this is the fundamental part in any construction process. We have over seven years experience in this field. Our teams (consisting of 6 personnel) are divided into two, the first team will be doing the preparation work where after the second team will focus on the final coats.

ROOF COATINGS

- Roof Coatings of Concrete Roof Tiles
- IBR Sheeting
- Corrugated Sheeting
- Flat Concrete Slabs
- ✓ Airless Spray
- ✓ Brush & Roller Application

The preparation work on the roof is as important as any structural elements. The preparation work includes the waterproofing where applicable before the inspection is conducted and before the final roof coats are applied. This is done either by brush and roller or airless spray.

DAMP PROOFING

- Rising Damp
- Lateral Damp
- Penetrating Damp
- ✓ Injection & Tanking Method

Alfa Waterproofing and Painting Contractors is an accredited damp proofing contractor with Dampsure. We use the most advanced materials and methods when damp proofing any structural element. Our workmanship as well as the products are guaranteed for ten years.
